

DEPARTMENT OF THE ENVIRONMENT

CANADIAN ENVIRONMENTAL PROTECTION ACT, 1999

Significant New Activity Notice No. 16082

Significant New Activity Notice

(Section 85 of the *Canadian Environmental Protection Act, 1999*)

Whereas the Minister of the Environment and the Minister of Health have assessed information in respect of the substance 2-Propenoic acid, 2-methyl-, polymer with 2-(substituted)alkyl 2-methyl-2-propenoate, 2-propenoic acid and polyfluoroalkyl 2-methyl-2-propenoate, acetate, under section 83 of the *Canadian Environmental Protection Act, 1999*;

Whereas the substance is not specified on the *Domestic Substances List*;

And whereas the Ministers suspect that a significant new activity in relation to the substance may result in the substance becoming toxic within the meaning of section 64 of the *Canadian Environmental Protection Act, 1999*,

Therefore, the Minister of the Environment indicates, pursuant to section 85 of the *Canadian Environmental Protection Act, 1999*, that subsection 81(4) of that Act applies to the substance in accordance with the Annex.

JIM PRENTICE

Minister of the Environment

ANNEX

Information Requirements

(Section 85 of the *Canadian Environmental Protection Act, 1999*)

1. In relation to the substance 2-Propenoic acid, 2-methyl-, polymer with 2-(substituted)alkyl 2-methyl-2-propenoate, 2-propenoic acid and polyfluoroalkyl 2-methyl-2-propenoate, acetate, a significant new activity is the use of the substance in Canada, in any quantity, other than for use as

(a) a component of an oil and water repellent or an anti-soiling agent when they are industrially applied to paper, paperboard, textiles, fabric or carpeting;

(b) a component of a water-based protective sealer that is industrially or commercially applied to stone, masonry, grout or concrete; or

(c) a component of a water repelling and supporting agent that is used for treatments in the oil industry.

2. Despite item 1, the use of the substance as a research and development substance, as this term is defined in subsection 1(1) of the *New Substances Notification Regulations (Chemicals and Polymers)*, is not a new activity.

3. The following information must be provided to the Minister at least 90 days before the commencement of each proposed significant new activity:

- (a) a description of the proposed significant new activity in relation to the substance;
- (b) the information specified in Schedule 9 to the *New Substances Notification Regulations (Chemicals and Polymers)*;
- (c) the information specified in item 5 of Schedule 10 to those Regulations;
- (d) for applications involving spraying of the substance by consumers or in dwellings, the test data and a test report from a subchronic inhalation toxicity study, in rats, on 6:2 Fluorotelomer alcohol, conducted according to the methodology described in the Organisation for Economic Co-operation and Development ("OECD") Test Guideline No. 413 ("Test Guideline") titled *Subchronic Inhalation Toxicity: 90-day Study*, and in conformity with the practices described in the *OECD Principles of Good Laboratory Practice* ("Principles of GLP") set out in Annex 2 of the *Decision of the Council Concerning the Mutual Acceptance of Data in the Assessment of Chemicals*, adopted on May 12, 1981, and where both the Test Guideline and Principles of GLP are current at the time the test data are developed, or any other similar study or information, which will permit assessment of the subchronic inhalation toxicity of 6:2 Fluorotelomer alcohol; and
- (e) all other information or test data concerning the substance that are in the possession of the person who intends to use the substance for the proposed significant new activity, or to which they have access, and that are relevant to determining whether the substance is toxic or capable of becoming toxic, including information or test data that are relevant to determining the subchronic inhalation toxicity of the fluorotelomer-based degradation products of the substance.
4. The above information will be assessed within 90 days after the day on which it is received by the Minister.

EXPLANATORY NOTE

(This explanatory note is not part of the Significant New Activity Notice.)

A Significant New Activity Notice is a legal instrument issued by the Minister of the Environment pursuant to section 85 of the *Canadian Environmental Protection Act, 1999*. The Significant New Activity Notice sets out the appropriate information that must be provided to the Minister for assessment prior to the commencement of a new activity as described in the Notice.

Substances that are not listed on the *Domestic Substances List* can be manufactured or imported only by the person who has met the requirements set out in section 81 of the *Canadian Environmental Protection Act, 1999*. Under section 86 of the *Canadian Environmental Protection Act, 1999*, in circumstances where a Significant New Activity Notice is issued for a new substance, it is the responsibility of every person who transfers the physical possession or control of the substance to notify all persons to whom the possession or control is transferred of the obligation to comply with the Significant New Activity Notice and of the obligation to notify the Minister of the Environment of any new activity

and all other information as described in the Notice. It is the responsibility of the users of the substance to be aware of and comply with the Significant New Activity Notice and to submit a Significant New Activity notification to the Minister prior to the commencement of a significant new activity associated with the substance. However, as mentioned in subsection 81(6) of the *Canadian Environmental Protection Act, 1999*, a Significant New Activity notification is not required when the proposed new activity is regulated under an act or regulations listed on Schedule 2 to the *Canadian Environmental Protection Act, 1999*.

A Significant New Activity Notice does not constitute an endorsement from Environment Canada or the Government of Canada of the substance to which it relates, or an exemption from any other laws or regulations that are in force in Canada and that may apply to this substance or activities involving the substance.
